

Guidelines for Manuscript Preparation

To ensure a smooth submission process, authors must adhere to the following formatting and style guidelines when preparing their manuscripts for *Current Science*.

1. General Formatting

- Manuscripts must be typed in **Times New Roman, 12-point font**, with **double-line spacing**.
- Use a **single-column layout** in a Microsoft Word document (.doc or .docx). **PDF submissions will not be accepted.**
- Set **1-inch margins** on all sides and **justify the text**.
- Number all pages **sequentially in the bottom right corner**.
- Maintain **consistent British English spelling and grammar** throughout.
- Ensure uniformity in **terminology, abbreviations, and formatting** across the manuscript.
- Use **boldface, italics, subscripts, and superscripts** appropriately for clarity.
- Adopt a **formal, objective tone**, avoiding redundancy, jargon, and informal expressions.
- Use **inclusive language** to ensure accessibility and fairness in communication.

2. Author Information

- Provide **author names** along with **affiliations**, including **institution name, location, and postal code**.
- Indicate **one corresponding author's email address**.

3. Abstract and Keywords

- Submit a structured abstract summarising the research concisely.
- 5-6 Keywords to be provided in alphabetical order.

4. Ethical and Legal Considerations

- Properly **attribute all sources** and **avoid plagiarism**.
- Obtain **necessary permissions** for any reproduced/copyright material.

- Disclose any **potential conflicts of interest**.
- Ensure research **complies with ethical guidelines** for human and animal studies.
- Declare **funding sources** and acknowledge financial support where applicable.

5. Figures and Tables

- Number figures and tables sequentially (e.g., **Figure 1, Table 1**).
- Place **figure captions below** the figures and **table captions above** the tables.
- Use **high-resolution images** for figures to ensure clarity and readability.
- Ensure figures and tables are **cited in the main text in sequential order**.
- Provide **editable formats (e.g., JPEG, PNG, etc.)** for figures and graphs where applicable.
- If an **India map** is included, ensure it adheres to the **Geological Survey of India (GSI)/Survey of India(SOI) standards**.
- Make sure that all cited figures/tables/annexures/appendix and other supporting materials are provided and vice versa.
- All abbreviations and symbols used in the tables and figures should be clearly described in footnotes.

6. Units and Symbols

- Use **SI units consistently** throughout the manuscript.
- Insert a **thin space between the number and the unit** (e.g., **10 cm**, not **10cm**).

7. Equations

- Use **LaTeX format** for mathematical symbols and equations where applicable.

8. Abbreviations and Acronyms

- Define abbreviations upon first mention, followed by the abbreviation in **parentheses**.
- Avoid using abbreviations in **headings**, unless they are widely recognized.
- Use abbreviations **consistently** throughout the manuscript.
- Genus and species names to be in italics and full name of genus should be provided at the first mention.

8. References and Citations

- Format references and citations according to ***Current Science's* specified referencing style.**
- Ensure all **cited works are available and verifiable.**
- Include **DOIs or permanent links** for references where applicable.
- Cite references **serially (in superscript)** first in the main text and then continue in the tables/figures in the order they appear. References should not include unpublished source materials. Make sure that all references are cited according to journal format in the manuscript. Avoid duplicate/repetition of references in the list.
- **Do not cite references in the abstract.**
- **Non-compliance with citation guidelines will lead to immediate rejection.**

The list of references at the end of the text should be in the following format.

1. Lindley, S. T., Estimation of population growth and extinction parameters from noisy data. *Ecol. Appl.*, 2003, 13, 806-813.
2. Martin, H., The Archaean grey gneisses and the genesis of continental crust. In *Archaean Crustal Evolution* (ed. Condie, K. C.), Elsevier, Amsterdam, 1994, pp. 205-259.
3. Rao, K. N. and Vaidyanadhan, R., Geomorphic features in Krishna Delta and its evolution. In *Proceedings of the National Symposium on Morphology and Evolution of Landforms*, Department of Geology, Delhi University, New Delhi, 1978.

9. Acknowledgements

Declare **funding sources** and acknowledge financial support where applicable. If persons are acknowledged, provide organisation/institute name and location to which they are affiliated.

By following these guidelines, authors will facilitate a smooth peer-review process and enhance the readability and professionalism of their submissions. Failure to adhere to these requirements may result in delays or rejection of the manuscript. For additional details, refer to the **Archive section** on our website.
